WORK EXPERIENCE

Software Development Intern (16 Months), J.D. Power | Autodata Solutions Division

May 2021 – Aug. 2022

- Developed and maintained over 80 enterprise-level APIs, high throughput ETLs, Utilities, and Libraries in Java using Spring Boot, Storm, and Apache frameworks to support product teams
- Lead development of full stack application used by product and QA teams for internal data tracing across our full suite services to significantly improve investigation time and efficiency
- Managed containerization and deployment for dozens of internal products and services using Kubernetes, Docker, Jenkins, Rancher, and Gitlab CI/CD
- Successfully trained and mentored new employees on our codebase, development practices, testing standards, and deployment processes

Digital Media Designer, Western Technology Services | London, Ontario

June 2020 – April 2021

- Developed interactive learning modules and course content for Western University's Learning Management System, OWL, which has over 30,000 daily users.
- Gained valuable skills in Customer Service and Quality Assurance

Produce Department, No Frills | London, Ontario

Aug. 2017 – May 2020

- Worked with a team to maintain the produce department efficiently (part time)

PERSONAL PROJECTS

Checkable | *Checkable.ca*

June 2022

- Developed a full stack app used by the Ivey HBA Association for collaborating on shareable checklists.
- Leveraged the MERN stack to develop a REST API and intuitive front end adapted for mobile and desktop use.

Quotey | *Quoteytech.github.io/website*

August 2020

- Developed a web app to display a random quote for students in need of inspiration.
- Created using a combination of HTML, CSS, and JS for an appealing UX.

Personal Website | *ConnorHaines.net*

July 2020

- Created for networking using experimental JavaScript animations and transitions.
